pattern	<pre> graph LR Message[Message] -- hasTag --> Tag[tag: Tag name = \$tag] Message -- replyOf* --> Comment[comment: Comment] Comment -- hasTag --> relatedTag[relatedTag: Tag name != \$tag] Comment -- count --> count[count] </pre>			
desc.	Find all <i>Messages</i> that have a given <i>Tag</i> . Find the related <i>Tags</i> attached to replies of these <i>Messages</i> (direct relation not transitive), but only of those replies that do not have the given <i>Tag</i> . Group the <i>Tags</i> by name, and get the count of replies in each group.			
params	1	tag	String	
result	1	relatedTag.name	String	R
	2	count	32-bit Integer	A
sort	1	count	↓	
	2	relatedTag.name	↑	
limit	100			
CPs	1.6, 3.3, 5.2
