

## Interactive / short / 2

query	Interactive / short / 2			
title	Person Recent Messages			
pattern	<pre> graph LR     P1[person: Person] -- hasCreator --&gt; M[Message]     M -- "replyOf*1.." --&gt; Post[Post]     Post -- hasCreator --&gt; P2[op: Person]     style P1 fill:#f96,stroke:#333,stroke-width:1px     style M fill:#999,stroke:#333,stroke-width:1px     style Post fill:#f00,stroke:#333,stroke-width:1px     style P2 fill:#f96,stroke:#333,stroke-width:1px             </pre>			
desc.	<p>Given a start Person, retrieve the last 10 Messages created by that user. For each message, return that message, the original post in its conversation, and the author of that post. If any of the Messages is a Post, then the original Post will be the same Message, i.e. that Message will appear twice in that result.</p>			
params	1	Person.id	ID	
result	1	Message.id	64-bit Integer	R
	2	Message.content or Post.imageFile	String	R
	3	Message.creationDate	DateTime	R
	4	Post.id or Comment-replyOf*->Post.id	ID	R
	5	Post-hasCreator->Person.id or Comment-replyOf*->Post-hasCreator->Person.id	ID	R
	6	Post-hasCreator->Person.firstName or Comment-replyOf*->Post-hasCreator->Person.firstName	String	R
	7	Post-hasCreator->Person.lastName or Comment-replyOf*->Post-hasCreator->Person.lastName	String	R
sort	1	Message.creationDate	↓	
	2	Message.id	↓
